ARMADA
THE REAL SOLUTION TO **OVERVOLTAGES**

Copyright - protection of intellectual property

TECHNOLOGICAL INNOVATION
GUARANTEEING YOUR SAFETY

Increasing electrification, robotization, automation:

Technological innovations lead to the creation of more efficient products, but also more sensitive to electrical disturbances.

There are many reasons for transient overvoltages and new ones appear by the hundreds every hour.

Lost data, reduced lifespan of your devices, unexpected interruptions in operations, material destruction: the damage to your business is in thousands of dollars.

Another catastrophic consequence; your investments can be destroyed in the blink of an eye by a very strong surge: the lightning.

By arming yourself with Armada, save on maintenance, equipment costs and avoid losing everything.

Did you know?

During a major overvoltage, damaged equipments are :

- / Security and fire alarm systems **fire every other time** ;
- / Emergency generators and emergency power supplies **once in three**.

The damage caused by these surges costs more than **\$26 billion every year** in the United States alone, according to the Insurance Institute for Business and Home Safety.

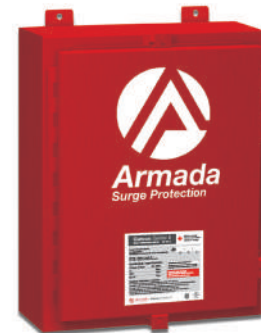

The causes:

- / Frequency converter
- / Condenser bank
- / Starting engines
- / Switching of inductive loads
- / Voltage converter
- / Ground fault
- / Overvoltage from your electrical supplier
- / Return of current
- / Lightning

SMART CONNECTIVITY

Armada protectors can connect to any control system within your company. No need to move to check their status, you are informed directly on your platform. >>>

GALEOS Series 6

GALEOS Series 2+

LISTED SPD No: E500900

By storing the excess of energy from your electrical network, the Armada Surge Protector removes the risk of shutdown during minor events. It ensures that your devices will be fully operational in case of a catastrophic event.

Technology Innovation : Power Pressure™

The reliability of the Armada protector is guaranteed by the Power Pressure Technology, a patented and unique technology that provides a network **connection 100 times longer** than its competitors thanks to a design without fuse or electronic circuit. The Armada product will safely dissipate energy that can be equivalent to **lightning energy**.
