

Armada[®] **Galeos** Series 4 protectors are specially designed to defend 240 V networks. Against all types of electrical events, their innovative design offers the highest levels of safety and durability.

Encapsulated Components

Innovative design without fuse or electronic circuit, eliminating the risk of fire or electric arcing.

TMOV New Generation

Internal components with a higher capacity for a more efficient, powerful and enduring machine.

Increased Lifetime

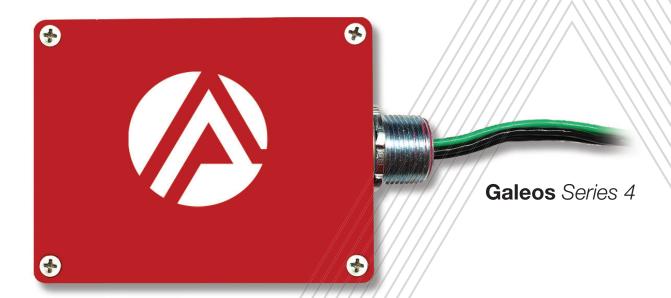

High heat transfer coefficient that increases the life of the device (20 times more heat dissipation).

Power Pressure Technology™

Transformation of electrical energy into kinetic energy to absorb powerful short circuits.

Unique Evacuation System

Safe expulsion of excess pressure while remaining airtight.

DataSheet Series 4

| Type | 2 |
|--|---------------------------------------|
| Voltage | 240V |
| Phase | 1 |
| Protection modes | L-N, L-G, N-G |
| Voltage Protection Rating (VPR) | 900V |
| Maximum Protection under Continuous Voltage (MCO\ | /) 275V |
| Reponse Time | <1 ns |
| Nominal Discharge Rating (In) | |
| SCCR | 20 kA |
| Operation Temperature | 40°C to + 85 °C / -40°F to 185°F |
| Disjoncteur | |
| Certifications | |
| Aluminium Enclosure | |
| Grounding according to IEED STD 142 recommending a | n electrical resistance below 25 ohm. |

Dimentions

Following dimensions are for one unit only.

Your Armada device is adjustable to fit any electrical installation, industrial or domestic.

Alone or set in series, the device is easy to install to offer a unique modular and adaptive design. That is why it suits every need and uses, whatever your network's load.

Please refer to an agent for more information.
